2 FINDINGS and CONCLUSIONS

Based upon its review of the exhibits and the record of the proceedings the Board finds and concludes that:

- 2.1 The Board finds the proposed Residential Compounds satisfies the purpose of the Subdivision Control Law, G.L. c. 81K-81GG, to protect the safety, convenience, and welfare of town inhabitants.
- 2.2 The Applicant proposes the subdivision as a Residential Compound under § 10 of the Rules, the purpose of which is to permit small-scale Residential Compounds in a manner that minimizes Town maintenance responsibility and cost, while simultaneously preserving the rural character of the Town.
- 2.3 The Board finds that the proposed Residential Compound satisfies the purpose of § 10 of the Rules.
- 2.4 Section 10.1.1.1 of the Rules authorizes the Board to broadly waive design and improvement requirements of §§ 8 and 9 of the Rules, if the required criteria are satisfied.
- 2.5 The Site is located within the Residence 8 (R-8) zoning district and the Groundwater Protection District Zone 4.
- 2.6 The Definitive Residential Compound Plan shows the division of +/- 5.6 acres (+/- 243,936 square feet) into two lots for single family residential use. The Site currently has one house on it, which will be demolished.
- 2.7 The proposed single-family residential uses are allowed on the Site in accordance with the Zoning Bylaw (hereinafter the Bylaw).
- 2.8 The proposed lots as shown on the Plan complies with the area and frontage requirements of the Bylaw.
- 2.9 The application contains the requisite waiver request and is eligible for consideration as Residential Compound. The Applicant has demonstrated with a “proof plan” that the subdivision street could be built with the same number of units under the otherwise applicable requirements of the Rules and other applicable laws.
- 2.10 The proof plan dated January 31, 2023 shows two proposed dwelling units and the paved way outside the 75-foot wetland buffer. A paved surface area in compliance with the Rules section 8.1.18.1 (loop turnaround) could fit within the proof plan layout and be outside the 75-foot wetland buffer.
- 2.11 The Plan shows that each building lot has the frontage required by the Bylaw, and that all present and future owners of the lots within the Residential Compound have adequate and legally enforceable rights of access to a public street.
- 2.12 Pope Road is considered a Local Street in the Town of Acton.
- 2.13 A Residential Compound is less intrusive to the neighborhood than a standard subdivision, it preserves more of the natural environment of the Site, and helps preserve

the present character of the neighborhood. The Plan, as modified herein, accomplishes these purposes of the Rules' Residential Compound option.

- 2.14 Places in a Residential Compound subdivisions can be built to lesser design and construction standards than other streets in Acton. They are intended to remain private way; the owners are prohibited from petitioning the Town to maintain the road way or to accept it as a public way. This requires a legal framework for the maintenance and ownership of the private way.
- 2.15 By reference to the common drive standards of the Bylaw, the Rules require that "adequate drainage" shall be provided. Due to the low-intensity use and vehicle traffic, Low Impact Development (LID) options could be considered for purposes of handling storm water runoff. Generally, LID design seeks to avoid or minimize storm water discharge from the site, to disperse groundwater recharge locations throughout the site rather than concentrate recharge in one or few areas, and to handle storm water primarily with above-ground facilities and structures such as swales, recharge beds, or porous pavers.
- 2.16 Traffic on the proposed streets will be light with the addition of two new single-family dwelling units respectively. The Residential Compound more or less as proposed is appropriate for the Site.
- 2.17 The proposed pavement width is 12 feet with four-foot shoulders.
- 2.18 The proposed siting of the homes on each lot complies with the minimum setback dimensions of the Bylaw, although the siting of the homes remains flexible within the building setback envelopes shown on the Plan.
- 2.19 Elevations and grades on the Site appear suitable for the proposed residential compound street to be constructed and follow grading requirements of Bylaw section 3.8.1.5.
- 2.20 The intersections and turn-around areas as shown appear to accommodate the dimensions of an SU-30 vehicle.
- 2.21 There are existing bordering vegetated wetlands on the eastern section of the parcel(s). The Application is subject to Conservation Commission approval.
- 2.22 Pope Road is a scenic road. The removal of portions of the stone wall was approved by the Planning Board on February 21, 2023.
- 2.23 Section 9.6 of the Rules requires the applicant to provide sidewalks on one side of the traveled street within the proposed subdivision and along the portion of any existing public street upon which the subdivision Site has frontage. The Board does not waive this requirement, except for allowing on a case by case basis (a) equivalent sidewalk construction in suitable alternative locations, or (b) an equivalent contribution to the Town's sidewalk fund. Based on the Board's standard contribution rate of \$20/foot of sidewalk in proposed new subdivision streets and \$50/foot of sidewalk along an existing public street which the subdivision Site has frontage, the contribution would be approximately $(104.4 \times \$50 + 306 \times \$20) = \$11,340$.
- 2.24 The Applicant offered to make a donation to the sidewalk fund in lieu of constructing the sidewalks.

2.25 The Board solicited comments from various Town departments. They are listed in Exhibit 1.4 above. The Board considered all comments in its deliberations and made them available to the Applicant. They are restated herein as required plan modifications or conditions as deemed appropriate by the Board.
