IV. Review & Discussion – Expedited Permitting for Green Manufacturing

Board members discussed the advancement of these items: provisions for Green Manufacturing should tie in with the Master Plan; they need to be business friendly; need to figure out where they could be applied; time frames; whether to encourage reuse of built land and/or allow development for green uses on unbuilt land.

Board members questions and concerns with respect to the specific provisions in State law were:

- Why do we need it? Is it Practical? We could loose control and it could work against us. What is new? There is already a process in place for special permit that meets the State law time frames and procedures.

V. Discussion – Goals for Coming Year

Board members discussed furthering the Comprehensive Community Plan as a central objective. Board members to volunteer to help on Comprehensive Community Plan. Other items discussed: DRB is looking for ways to obtain perspective views of projects, from a street for instance; continue with communication with business community to understand their current issues and to see how doing business in Acton could be made easier; further plans for Kelley's Corner; a tree fund.

VI. Review: Open Meeting Law and Conflict of Interest Law

Board members reviewed the documents and noted the sensitivity of the subject and that caution is always necessary. Examples were discussed on how one can unduly influence a decision and get penalized by the State Ethics Commission for it.
