

# SOUTH ACTON VILLAGE COMPLETE STREETS PLAN OPEN HOUSE EVENT

The Town of Acton is embarking on a targeted **Complete Streets Study for Main Street (Route 27) within South Acton Village**. The project aims to address several key issues, including the poor condition of sidewalk, the need for safer pedestrian and bicycle accommodations, and the challenges poised by a series of closely spaced intersections that connect to the South Acton commuter rail station, the Assabet River Rail Trail (ARRT), and local businesses.

The Town has been working with a consultant team to identify possible improvements in the South Acton Village. We have been collecting data about the area and have reached out to the community for input. To see information collected to date, scan the QR code or follow the link to the right to the interactive webpage. At this open house, the consultants will review what we have heard from the community and present conceptual recommendations for street improvements.

## Please Join Us!

**Thursday April 3, 2025  
6:00 - 8:00 PM**

**Acton Town Hall - Room 204  
472 Main Street  
2nd Floor  
Acton, MA 01720**
