### **THE IMPORTANT FACTS ABOUT TICKS**

#### **15 Facts About Ticks You Should Know...**

1. Ticks are not insects.
2. Only a few types of ticks spread diseases in the U.S.
3. If a tick bites you, it'll probably stick around for a few days.
4. Ticks don't start transmitting diseases ASAP.
5. Ticks can spread multiple diseases at once.
6. Most Internet home remedies don't work.
7. You should remove a tick with a pair of tweezers.
8. The symptoms from tick-borne illnesses can show up within a few days.
9. Not everyone with Lyme disease will get a rash.
10. Just because a tick can transmit a disease doesn't mean it will.
11. Lyme disease rates have been climbing steadily.
12. There is no Lyme disease vaccine for humans, but there is one for dogs.
13. You're most at risk for a tick bite in the summer.
14. You can protect yourself against ticks.
15. You should do tick checks every two to three hours.

For details on the above Tick facts, click [here](#).

#### **COMPLIMENTARY TICK REMOVAL KITS**

## **STORMWATER MATTERS**

When you are walking your favorite neighborhood loop, do you ever wonder where that storm drain in the road leads? The answer is it drains to a nearby waterbody or wetland. Taking steps to keep storm drains free from debris and contamination can result in less flooding of roadways and cleaner waterways. To learn more, visit [www.actonma.gov/339/stormwater](http://www.actonma.gov/339/stormwater).

## Is there a tick on you?

### Do a tick check!

#### Here's where to look:

- ⊙ Inside and behind the ears
- ⊙ Along your hairline
- ⊙ Back of your neck
- ⊙ Armpits
- ⊙ Groin (where your legs join your body)
- ⊙ Legs
- ⊙ Behind the knees
- ⊙ Between your toes

Ticks are tiny, so look for new "freckles."

Spring is here and that usually means that everyone would like to have their yard looking nice. The Acton Fire Department advises everyone to be careful when using outdoor power equipment.

### **TAKE CAUTION WHEN REFUELING YOUR LAWN MOWER**

- Allow your lawn mower to cool before adding gasoline. Gasoline vapors are invisible and could ignite easily when coming in contact with a hot muffler.
- This practice should be used on all gasoline powered equipment.
- Always store gasoline in an approved container.
- Refrain from smoking while refueling.
- Secure the gasoline can in an upright position and keep away from any ignition source.
- Never transport gasoline in the passenger compartment of a vehicle.
