

High Street Safety Improvements Public Meeting

The Town of Acton invites the public to give input on safety improvements for High Street between Route 27 (Main Street) and Route 62 (Powder Mill Road).

Background: The Town of Acton is conducting a RSA (Road Safety Audit) to determine safety issues within High Street for all road users. The objective of the RSA is to gather feedback on possible short-term and long-term interventions that will reduce crash incidents, speeding, and provide safety benefits for all road users. The feedback from this public meeting will be part of the RSA report and will inform future changes on High Street.
