Please join us for an Open House to discuss a complete street design concept for Powder Mill Road (Route 62) between the Concord and Maynard town lines.

Complete streets are roadways that safely and comfortably accommodate all users, regardless of age or ability or mode of transportation (walking, bicycling, driving, or riding transit).

Over the past several months we have collected traffic data and assessed several design alternatives to accommodate pedestrians, bicyclists, and vehicles along this segment of Powder Mill Road. We have developed a conceptual design plan for public review.
